# Glossary & Descriptions

Core Premier Elite Add-on

## ADA Compliant Platform

DealerOn's platform complies with ADA standards when configured out of the box. Dealers who choose to customize their platform might also be interested in adding a consumer facing ADA tool (accessiBe) for an additional cost.

## accessiBe® ADA Tool

Harness the power of AI to quickly and easily enhance and remediate the accessibility of your website to comply with ADA requirements.

*Note: This tool is designed to remediate accessibility issues for your content; however, due to the ever-changing legal environment, it is offered with no warranty.*

## HTTPS

All of DealerOn's websites are served securely over HTTPS.

## Dedicated Account Team

## Call Tracking

All website customers will receive 8 call tracking numbers allowing them to measure their dealership's desktop and mobile results (phone calls) for Sales, Service, Parts, and one other trackable dealership function.

## Inventory Management

DealerOn's inventory management system lets you import, edit, and deliver inventory from any DMS to your website and third-party sites. Dealers can add pricing, pictures, and custom comments for every vehicle in inventory, with the ability to make modifications to specific pieces of inventory before being published to the website. Additionally, dealers can create bulk pricing rules for easier management.

## Customizable Compliant Homepage Design

## Enterprise Specials Manager (ESM)

ESM is a tool that allows dealers to create and customize special offers without the hassle of support tickets and help desks. We have given the control back to our dealers with a tool that allows you to edit in bulk and share offers across multiple dealerships, cutting down on time and hassle. This Specials tool also includes the ability to set customized schedules for offers, an easy-to-use media gallery that allows you to upload your own graphics, and customizable CTAs and buttons per offer. Even better ESM automatically creates dynamic landing pages for every special created in the system.

## Local SEO Fundamentals

DealerOn's website platform provides SEO customization and management tools that digital agencies and in-house SEO teams crave. Dealers can easily customize SEO components across all major platform pages, leveraging a library of replacement codes, so that a few quick SEO edits can update all vehicle details pages with optimized content based on whatever keyword patterns the dealer or their agency selects. Every DealerOn website comes complete with a custom homepage content written for your unique dealership by our team of content writers. Additionally, our out-of-the-box SEO configurations include hyper local title tags, meta descriptions, URLs, and use of proper heading tags.

# Glossary & Descriptions Cont.

Core Premier Elite Add-on

- Core Premier Elite Beacon Website Reporting** (powered by Google Analytics)  
DealerOn's Beacon Website Reporting provides clear, concise reporting on the health of your website on a 24x7 basis. Beacon is powered by Google Analytics 360, so dealers can trust the data they see. Beacon also showcases inventory performance and allows you to quickly see key merchandising insights on each vehicle in stock.
- Core Premier Elite Integrated WordPress Blog**  
DealerOn provides all dealers with a fully integrated WordPress blog that exists as a folder within the primary URL of the domain for maximum SEO value. Dealers may then write their own search optimized content to leverage the powerful platform that we provide.
- Core Premier Elite Structured Data Optimized for Local Businesses**  
In order to help maximize our dealers' organic search traffic and Google visibility, DealerOn frequently updates our VDP's and SRP's to incorporate the most current and comprehensive structured data markup for each dealer's inventory. Google has provided and updates the specifications for optimal page markup via the schema.org standard, which Google endorses. Google provides webmasters with their requirements for how to represent vital product information like Price, Ratings, # of vehicles, MPG, etc. in the code on each page. Google, in turn, will frequently display this information in their Search Results (showing star ratings, price ranges, etc.). DealerOn has measured an **increase from 25-50%** in organic search traffic going directly to inventory listing pages with our structured data implementation.
- Core Premier Elite Unlimited Inventory Exports**  
DealerOn can provide free inventory exports of all relevant inventory data to 100's of 3rd party websites that host dealer inventory. This file can include these and other, similar fields:
- VIN / Stock ID
  - Vehicle Make / Model / Trim / Body Style / Transmission
  - Exterior / Interior Color
  - MSRP / Invoice / Dealer Price
  - Dealer Comments
- Core Premier Elite Loop Alerts**  
Loop Alerts allows online car shoppers the ability to set-up a wide variety of notifications based on dealership inventory and pricing. Shoppers can receive text or email notifications every time a vehicle has a drop in price or when a car with their specifications or range of payments appear on a dealer's site. Loop Alerts are designed to keep car shoppers actively engaged with your dealership and provide a mechanism to keep you top-of-mind in a highly competitive marketplace.
- Core Premier Elite Loop eWallet Coupons**  
Loop eWallet Coupons allow consumers to quickly store service coupons and offers in their phone's eWallet (Apple Wallet on IOS or Google Pay on Android devices). Taking advantage of geo-location services, customers who have these coupons on their phones receive lockscreen notifications reminding them to use the coupons that they have downloaded as they pass by the physical location of the dealership.
- Core Premier Elite Loop Send-By-Text**  
Loop Send-By-Text, offers car shoppers the ease of sending information about a vehicle to their phones or simply sharing vehicles with friends and family who are in the car buying process. Loop Send-By-Text is part of the Loop family of features, which focuses on generating meaningful re-engagement opportunities, by keeping your dealership top of mind for prospective car buyers and their connections.

# Glossary & Descriptions Cont.

C Core P Premier E Elite + Add-on

## CPE **Search Valet**

DealerOn's proprietary elastic Inventory Search Engine -- Search Valet -- provides full text search capability to a dealer's inventory and ensures that highly targeted and accurate results are returned by the shopper's queries. This free-form Inventory search tool promotes the concept of giving customers extensible search options.

## CPE **Video Hero** (Optional Homepage Video)

Allows dealers to play OEM or custom video on the hero image section of their homepage.

## CPE **Lead Driver Coupons**

Lead Driver Coupons are a part of DealerOn's Lead Driver feature family designed to drive additional high-quality, high closing percentage leads to dealerships (over and above what is already expected from our industry leading website platform). Lead Driver coupons allow the dealer to provide an entry offer as a car-shopper first visits their website, as well as upon exit. Lead Driver coupons avoid pop-up blocker technology, while adhering with all of Google's best practices, all while providing dealerships with a significant boost to their leads.

## PE+ **Lead Driver Geo-Fencing**

Lead Driver Geo-Fencing allows the dealer to set up "fences" around competitor's lots, colleges and universities, or any other business in their area. Once a fence has been set up, you can create targeted offers directed at those consumers who are browsing your website from one of the fences.

## PE+ **Lead Driver Behavioral Targeting**

Lead Driver Behavioral Targeting is a part of the Lead Driver feature family designed to drive additional high-quality leads to dealerships (over and above what is already expected from our industry leading website platform). The Lead Driver Behavioral Targeting Engine allows for intent driven exit messages as a user attempts to leave the site. The patent pending technology allows dealers to create personalized messages based on the user's browsing behavior.

As an example, dealers can create specific offers when a consumer has been browsing service pages or a tailored message if they have been browsing used cars. Dealers who use the Lead Driver Behavioral Targeting Engine typically see a **25% - 30% lift in lead conversions** vs those who do not.

## PE **A/B Testing** (Consulting Included)

Gain access to our A/B testing platform and Optimization Client Services team. Dealers can conduct A/B tests of changes and measure/value the results of their testing plan with our Optimization team. They may also opt in to DealerOn platform A/B tests where their site or sites participate in Platform-wide A/B tests & optimizations when multiple dealers request similar tests. This process provides a much faster result with a higher statistically significant confidence level.

## PE+ **PriceStak Payments**

PriceStak Payments are an extension of DealerOn's PriceStak family of features. They allow a dealer to showcase a baseline lease and finance payment for each vehicle, based on dealer configurable settings. This feature does not allow for customer payment personalization. Dealers can consider upgrading to the Elite package to avail of DealerOn's APEX digital retailing tool which allows for payment personalization.

## PE **PriceStak Locked Offers**

PriceStak Locked Offers are an extension of DealerOn's PriceStak family of features. PriceStak Locked offers allow a dealer to showcase discounted prices or text only after a consumer has submitted a lead.

# Glossary & Descriptions Cont.

 Core  Premier  Elite  Add-on

## **PriceStak Homepage Shop-By-Payments**

Allows for a seamless payments driven shopping experience from the homepage to the digital retailing tool.

## **Listings Manager**

Listings Manager allows dealers to quickly and easily manage Google Business Profile changes simultaneously with their websites. As an example, dealers can make a change to their sales hours and seamlessly have that update reflected on the dealer's DealerOn website and Google Business Profile all in few clicks of a button. Listings manager also integrates with DealerOn's ESM (Enterprise Specials Manager) and Symphony Specials product to automatically post dealer specials to GBP as offer posts.

## **Beacon ROI Reporting**

Beacon ROI Reports provide crystal clear visibility into the return on the dollars you have invested in DealerOn's website and advertising services by accessing your DMS Sales and RO data. Easily track the number of cars sold from leads generated by DealerOn, identify key markets, and create specials with the click of a button for inventory that is not moving as fast as you want it to.

## **Symphony Automation Bundle**

Symphony Specials is DealerOn's automated specials creation engine, aimed at saving dealers tens of thousands of dollars annually by eliminating all of the manual labor in monthly specials creation. Every month Symphony automatically creates lease, finance, cash and offer specials based on the incentives and rebates direct from your manufacturer using the PriceStak Payments configuration. Specials are created based on existing inventory and update automatically when cars are sold.

### **Symphony Local Listings**

Extends the power of Symphony Specials to Google Business Profiles - one of the most important sources of leads for dealers today. Symphony takes your top offers and posts them to the Google Business Profile "offers" section. As your specials update, your Google Business Profile offers update simultaneously with little to no manual input required.

### **Symphony Ads** (for DealerOn Dig Ad customers)

Extends the power of Symphony Specials to Google and Facebook ads.

## **Design Studio**

Design Studio is an integrated DealerOn application that allows dealers to generate beautiful agency quality creative without the cost. Design Studio employs an easy to use drag and drop interface that allows dealers to select from hundreds of pre-built templates that can be customized to their needs. Dealers can also have custom templates designed and uploaded for their dealerships to build banners and other image-based creative.

# Glossary & Descriptions Cont.

 Core  Premier  Elite  Add-on

## **Additional Domain Certification**

## **Additional Inventory Feed**

## **Advanced Pricing Matrix**

Complete inventory pricing in a fraction of the time. Set pricing rules in the most flexible manner possible, for both New and Used.

## **Premium Call Tracking**

- Includes unlimited minutes and two lines.
- Best in class platform.
- Integrates directly with Google Analytics.
- Tracks all website phone calls to the Visitor Level to best attribute ROI.

## **Spanish Websites**

DealerOn's Spanish Language websites gives dealers a complete in-language digital marketing platform to provide the optimal customer experience to this rapidly growing and increasingly important market segment. Additionally, our clients get the benefit of each site ranking appropriately in Google's search results for in-language searches (Spanish site can rank for Spanish queries and English for English searches).

DealerOn's platform provides English and Spanish versions of each page, in precisely the manner that Google requests. The platform also lets consumers click back and forth between English and Spanish Language sites, so that they can choose which experience they prefer in their shopping/research process.

## **Video Pro Package**

DealerOn's Video Pro Package includes:

- New and Used VIN specific walk –arounds with human voice-overs
- 3 custom intros and 1 outro
- Human voice over with human custom comments
- Published to website, YouTube, Auto Trader, Cars.com (fees may apply), and Facebook
- VSEO strategy (YouTube channel)
- Reporting
